(3 marks)

"The story started last year," Hally said in a shaky voice. "Two things happened. First, one of Mr Crowhurst's rental houses burned down. I bet he was paid insurance money for that house. Is that right (13)" She looked directly at Mr Crowhurst.

The man stirred, looked surprised that she was talking to him, and then nodded. "Yeah, so what?" he said.

"So if you lost another house this year, the police might think that was pretty strange unless..."

Mr Crowhurst lurched to his feet with a roar, "How dare you accuse me (14)

"Sit!" the police chief commanded. Crowhurst sat (15) The police and other people would wonder unless the second fire had a pretty clear reason for happening," Hally continued. At this point, she paused and looked at Mr Crowhurst again before declaring, "And that is the key to this mystery."

For each question from 21 to 25, choose the word(s) closest in meaning to the underlined word. Shade the correct oval (1, 2, 3 or 4) on the Optical Answer Sheet.

(5 marks)

Wolves are territorial. Each pack of wolves lives and hunts in its own particular area. (21)

The territory may change with the season because of the migration of the prey species or (22)

weather conditions, or it may stay basically the same. Although the wolves are very sociable animals, that sociability extends just to the individual pack members. Territorialism is a basic (23) need for most predatory species because they need a given amount of food to ensure the pack's survival. The size of the territory is based upon such factors as the number of prey (24) species that can be found in their territory, the number of animals in the individual pack, and the fighting strength of the individual members within the pack.

Wolves announce their presence in the area by howling, thus <u>deterring</u> other packs (25) from entering their territory. Packs of wolves seldom come into contact with each other.

I woke suddenly and completely on Christmas Day. Four o'clock. The hour at which my father had always woken me up to help with the milking. Strange how the habits of my youth clung to me still. My father had been dead for 30 years! What was the magic of Christmas now? My own children had grown up and gone. I was left alone with my wife. Yesterday, she had said, "Let's not trim the tree until tomorrow, Robert. I'm tired." I had 5 agreed, and so the tree remained out in the backyard.

It was a still night clear and starry. The stars were extraordinary! Now that I thought of it, the stars seemed always large and clear before the dawn of Christmas Day. There was one star now that was certainly larger and brighter than any of the others. I could even imagine it moving, as it had seemed to me one night long age.

I was 15 years old and still living on my father's farm. My beloved father! I had not known it until one day a few days before Christmas, when I had overheard what my father was saving to my mother.

"Mary, I hate waking Rob in the mornings. He's growing so fast and he needs his sleep. If you could see how he sleeps when I go in to wake him up! I wish I could manage 15 alone."

"Well, you can't, Adam" My mother's voice was brisk. "He isn't a child anymore. He should take his turn."

When I heard my father's words, something in me stirred: My father loved me! resolved never again to loiter in the mornings or laze in the bed.

That night – the night before Christmas – I lay for a few minutes thinking about the next day. I wished I had a better present for my father. As usual, I had gone to the ten-cent store and bought a tie for my father. It had seemed appropriate until I lay thinking, and then I wished that I had heard my father and mother talking in time for me to save for something better.

I lay on my side and looked out of my attic window. The stars were bright, much brighter than I ever remembered seeing them, and one star was so bright that I wondered if it were really the Star of Bethlehem. I always loved the story of the special infant being born in a barn and to the barn the shepherds and the Wise Men had come bringing their Christmas gifts.

The thought struck me. Why should I not give my father a special gift too, out there in the barn? The next morning, at a quarter to three, I got up and let myself out stealthily. The big star hung lower over the barn roof, a reddish gold. The cows looked at me, sleepy and surprised. Perhaps it was early for them, too.

After giving some hay to each cow, I then got the milking pail and the big milk cans. 35 For once, it was not a chore. When my father entered the barn later, I greeted him with a smile and a hug. "Merry Christmas, Dad. You are the best!" With tears glistening in his eyes, my father told me, "This is the best Christmas gift ever."

Outside the window now, the great star still shone brightly. My father was long gone and I am now old. I got up and went downstairs to the living room. In the study, I picked up the 40 little box that contained my gift — an exquisite brooch — to my wife. I brought the tree in the backyard into the house — it was a little one — and tied the gift to the tree.

It had been a long time since I last told her that I loved her. It occurred to me suddenly that love was alive in me. It still was because it had been born in me when I knew my father loved me. It was the reason why I could keep giving again and again.

The arrival of the narwhal, the tusked whale of northern polar seas, is a long-anticipated
event in the Canadian Arctic. After months of darkness and as low as minus 4 (51)
degrees Celsius, winter way to spring, and the sea ice begins to melt. Open (52)
stretches of water travel lanes for the small whales as they follow the melting (53)
sea ice towards Baffin Island. In remote Inuit communities, of their arrival over (54)
the local field radio alerts hunters to reach for their rifles and for the ice edge. (55)
Like the Inuit, I too am eagerly awaiting the return of the tusked whales. For most of June,
my guide and I have at the edge of the island, waiting out blizzards and often
our tents to escape the melting sea ice. When finally we the (57)
squeaks, squeals, and blows of these vocal whales, we climb a large block of ice and cheer their
arrival.
At first the narwhals swim us in pods of eight or ten, then in grand (59)
processions of hundreds. As news of their return, Inuit hunters begin arriving (60)
on snowmobiles that are carrying camping and high-powered rifles.

Taking up along the ice edge, they watch and wait for narwhals to (62)
surface near enough to shoot a rifle and retrieve the dead narwhal with a (63)
grappling hook thrown by hand. The Inuit have looked forward to this moment all winter Each man
waiting on the ice hopes to land a whale with a tusk that could for more than a (64)
thousand dollars. This is a windfall in a remote regionjobs are scarce and the
cost of living high. The hunters also look forward to fresh <i>muktuk</i> , the top layer of blubber and skin
which is prized as a traditional delicacy.

Our father had taken us kids crabbing many times around Darwin; we felt he had taught us all we needed to know about it. Anyway, Bruce and I, who quite often took our baby brother Michael with us when we went fishing, had caught crabs before by ourselves. We loved the excitement of the chase, and eating crabs too, but this time we really wanted to return home with one or two big crabs especially for Mother, who had been suffering from 5 anaemia since Michael was born.

"Let's try Racecourse Creek' I said to Bruce. We had never been there before, and had only heard our father's exciting stories of fishing and crabbing trips there, but on that particular day, it felt like the right place to go.

The scene was exciting and yet a little terrifying too: the water threw up loud splashes and was grey and murky. "I can't see any fish," I muttered under my breath.

After surveying our new crabbing spot, I called to Bruce (who was 17 months younger than me), "Come on, we'd better hurry and find some crabs for Mum." By then, all I wanted to do was find a big mud crab or two and get out of the place. It now crossed my mind that our mother had no idea where we were If Dad or Mum found out we had gone to Racecourse Creek, we'd be in trouble for sure. Standing there by the river, I also grew concerned for Michael and Bruce. If an accident happens, it will be entirely my fault, I thought, because I was the eldes and the ultimate responsibility rested with me

I lifted 18-month-old Michael onto my left hip and gently eased myself over the high banks and down towards the river. Bruce had gone on ahead, prodding huge crab hole after 20 crab hole, so far without success. I moved slowly along the muddy bank, poking a homemade crab stick deep into each hole, twirling it around and searching the crannies, hoping to find a big, heavy crab.

"There're no crabs here, Sis," Bruce called back. "I'll go across to the island – you stay here with Michael."

"We're coming too!" I called straight back. There was no way Michael and I would stay back and let Bruce have all the fun. Besides, the nearer I was to Bruce, the safer I felt. By now, the place was starting to give me the creeps. The tide was drawing out the creek water from around the island faster than I had ever seen. In the short time we had been crabbing, so much more of the grey murky island had become exposed.

"Wait for me!" I called to Bruce as he began to cross the river. By now a little worried, Bruce and I kept close together as we moved slowly across to the island almost 100m from the bank, but the eventual sight of all the mud crab holes among the mangrove roots looked promising.

"There must be crabs here," I said to Bruce. "But we've got to start searching quickly." I 35 was spooked by the fast tide and keen to get out of there.

Bruce took his bag and crab stick and headed to the opposite side of the island. "I've got one!" yelled Bruce as he threw the crab into his bag. "That's great," I called back. With Michael still on board, I kept prodding and poking the holes, hoping to find my first crab for the day. Then I suddenly realised the tide must have turned and was now coming in as quickly as it had gone out; the island was going under. Loud rhythmical popping sounds began to fill the air. Frightened, I looked about, but reassured myself that the popping sounds were the result of air being expelled from the mud holes as the sea water covered them.

Ankle deep in water, I screamed to Bruce, "Hurry, the tide has turned! We have to get out of here now."
