Belle and her mother were taking a stroll along the beach when Belle chanced upon something glittery in the sand — a shell. Belle held up the shell in her hands. "Mummy, look at this pretty shell (13)" she called out to her mother excitedly. She was right (14) The shell was a rare one, one that even her mother had not seen before. It was so enormous that Belle's two hands were barely supporting it. "I've never seen such a shell before, I wonder where it's from (15) Belle's mother said, taking the shell from her daughter's hands. Its beautiful ornament designs reflected the sunlight perfectly.

There are many myths and legends surrounding the origin of the ancient well Fnown.

Olympic Games. The most prevalent legend describes Hercules as the creator of the (21)

Games, who built the Olympic stadium and surrounding buildings as a tribute to his father, Zeus, after completing his twelve labours. According to that legend, he walked in a straight line for 400 strides and called this distance a 'stadion' that later (22) prow.

also became a distance calculation unit. This is also why a present-day stadium is (23)

400 metres in circumference. According to scholars, the first Olympic Games were held as early as 884 B.C.

From then on, the Games quickly became much more important throughout ancient Greece, reaching its <u>peak</u> in the sixth and fifth centuries B.C. The Games (24) were held once every four years and the celebration was spread over several days.

Winners of the events were greatly <u>revered</u> and were immortalised in poems and (25) statues by the people. With the establishment of the International Olympic

Committee (IOC), the games started internationally in 1876 and continues till today.

Read the passage and answer questions 26 to 30.

Bringing a giraffe into the world is a tall order. A baby giraffe falls 10 feet from its mother's womb and usually lands on its back. Within seconds it rolls over and tucks its legs under its body. From this position it considers the world for the first time and shakes off the last **vestiges** of the birthing fluid from its eyes and ears. Then the mother giraffe rudely introduces its offspring to the reality of life.

5

In his book, "A view from the Zoo", Gary Richmond describes how a newborn giraffe learns its first lesson.

10

The mother giraffe lowers her head long enough to take a quick look. Then she positions herself directly over her calf. She waits for about a minute, and then she does the most unreasonable thing. She swings her long, pendulous leg outward and kicks her baby, so that it is sent sprawling head over heels.

When it doesn't get up, the violent process is repeated over and over again. The struggle to rise is momentous. As the calf grows tired, the mother kicks it again to stimulate its effort. Finally, the calf stands for the first time on its wobbly legs.

15

Then the mother giraffe does the most remarkable thing. She kicks it off its feet again. She wants it to remember how it got up. In the wild, baby giraffes must be able to get up as quickly as possible to stay with the herd, where there is safety. Lions, hyenas, leopards, and wild hunting dogs all enjoy young giraffes, and they'd get it too, if the mother didn't teach her calf to get up quickly.

20

The late Irving Stone understood this. He spent a lifetime studying greatness, writing novelised biographies of such men as Michelangelo, Vincent van Gogh, Sigmund Freud, and Charles Darwin.

_ -

Stone was once asked if he had found a thread that runs through the lives of all these exceptional people. He said, "I write about people who sometime in their life have a vision or dream of something that should be accomplished and they go to work."

25

"They are beaten over the head, knocked down, vilified, and for years they get nowhere. However, every time they're knocked down, they stand up. You cannot destroy these people. At the end of their lives, they've accomplished some modest part of what they set out to do." For each question from 26 to 30, four options are given. One of them is the correct answer. Make a choice (1, 2, 3 or 4). Shade the correct oval (1, 2, 3 or 4) on the Optical Answer Sheet.

	This is a handbook about the craft of fiction writing for new and emerging writers.
(41)	This handbook on writing cannot help you unless you invest time and effort in (42) developping your talents. For example, it's unwise to set off to be a writer of fiction
•	without first being a reader of it. Writers of fiction who are thoughtful readers of it are (43) (44) (44) better able to make informed assesments of their own work and forged their own writing
	styles.
	Becoming a writer also involvs patience and a readiness to rewrite. I once spent (46)
	a week writing a detailed reader's report for a man who first novel had been rejected by (47)
	a publisher. The novel had interesting characters and a moving teme, but it was too long
÷	by half, sloppily constructed and badly written. (48) I believed that many new writers have false notions about writing, the writer's life
<u>.</u>	and getting published. They don't realise that writing and rewriting require thought, care, (49)
	patience and long hours for solitary work. As long-distance runners need training, and
(50)	ongoing training, in order to run a marathon, writers learn to write by observing, being
	perseptive, reading, writing, drafting and refining, and establishing good work habits:

Section J: Comprehension Open-Ended (10 × 2 marks) Read the passage and answer the questions 71 to 80.

It seems to me that all writers, including those eminent ones, need encouragement particularly in their early years. I always knew I could write, but that just meant I wrote a little better than my peers. I hope that I might one day write well enough to derive income from my efforts. Oddly enough, this never occurred to me during my grade and high school years.

There was a benevolent teacher at Hyde Park High School in Chicago, who simply by concentrating her attention on me, made me believe that I might be able to master the knack of writing well enough to consider the craft as a profession. Her name was Marguerite Byrne and she taught English, which of course, involved writing skills. Whatever instruction she shared with me was exactly the same as all her other students enjoyed, but the difference was she encouraged me to begin the process of submitting things I was writing, in those days, chiefly poems.

To my surprise the Chicago Tribune not only thought enough of several of my verses to publish them, but also paid me -- inadvertently -- the highest compliment a fledgling author can receive. The editor wrote a confidential letter to Miss Byrne, asking her to see, if by chance, one of her students -- a certain Stephen Allen -- might be guilty of plagiarism. The editor's suspicions had been roused because, he was kind enough to say, he found it hard to believe that a seventeen-year-old could create material on such a professional level. When Miss Byrne shared the letter with me, I was ecstatic! It was wonderfully heartening.

Miss Byrne made me realise that I should not hide my light under a bushel. This made me muster my courage to enter a writing contest. The assignment was to write an essay titled "Rediscovering America." I was literally astonished when I received a letter saying that I was the winner of the contest. The prize was a thousand dollars. My mother, at the time, was not even aware that I was interested in writing, or if she had somehow found out about It, she took little notice. When I arrived home that evening with the letter, she was indifferent and did not ask how the evening had gone.

Without encouragement, talented students will continue to perform below expectations without the motivation to learn. For example, at the same high school, there was a teacher whose Spanish language classes I attended but from whom I, unfortunately learned very little simply because of the woman's cold sarcastically critical attitude. She seemed to know nothing about nurturing students. Soon, I withdrew from her classroom literacy instruction.

Years later, I was able to repay my debt to Marguerite Byrne by dedicating one of my books, Wry on the Rocks -- A Collection of Poems, to her. I have enjoyed a lifetime writing books and television scripts because of Miss Byrne's tutelage.
