Section C: Comprehension (10 marks)

Read the passage below and answer questions 11 - 16.

Janelle was a curious girl who loved to dive into the world of mystery books.

She would read under her blanket with a flashlight late at night. Solving puzzles and riddles were her favourite pastimes, and she was quite good at them too.

One morning, as Janelle was getting ready for school, her father could not find his glasses and said desperately, "I need my glasses to drive you to school. If 5 we don't find them soon, you will be late!"

Janelle's detective instincts kicked in. She asked him about the last time he had his glasses. He told her that he was watching a movie in the living room the night before when he took them off. Carefully, she searched the living room but there was no sign of the missing glasses.

Janelle asked her father to think again. He recalled having a bowl of cereal with milk in the kitchen before heading to his bedroom. Janelle searched those places but the glasses remained a mystery.

Not giving up, Janelle combed through all places, making sure not to miss any spot. Then, when she opened the refrigerator, she spotted something glimmering 15 behind the milk carton. It was the missing glasses! Janelle's heart filled with joy as she rushed to her father with the cold glasses in her hands.

"Wow! I have cool glasses now. Haha! Thank you, Detective Janelle!" her father exclaimed. Getting to school on time was no problem now!
