16    Dots are placed at an equal distance from each other along the 7 sides of the
3 triangles below. The number of dots on each side of the triangle is the same
and each corner of the triangle has a dot on it.

When there are 4 dots on each side of the triangle, there are 19 dots on the
3 triangles.

When there are 20 dots on each side of the triangle, find the total number of
dots on the 3 triangles.

Ans: _____
For Questions 17 and 18, show your workings clearly in the space below each question and write your answers in the spaces provided. The number of marks available is shown in brackets [  ] at the end of each question or part-question.          (8 marks)

17    In the figure below, not drawn to scale, ABCD is a square, DEFG is a rectangle, AC, CH, AH and GH are straight lines. Find the total area of the shaded parts.

Ans: _____ [4]
