	ow all instructions. Answer al are allowed to use a calculate		ons.			
Que prov	tion A stions 1 to 5 carry 2 marks each ided for each question and write questions which require units, gi	your an	swers in the spaces	provided.)	
1	40 tennis balls have a mass of ball? Give your answer correct			s of each tennis		
			Ans:		g	
2	A container contains 2 l 60 m containers. Give your answer		er. Find the volume	of water in 18 suc	h	
			·			
39% http://www.v			Ans:			
2024	P5 Math Term 3 Review	1	e i entre gran e en	4		

3	Mr Tan wanted to buy 14 cartons of drinks but he was short of \$11.40. Each carton costs \$15.20. How much money did Mr Tan have?
	Ans: \$
4	A tap takes 22 seconds to completely fill up a bottle with a capacity of 550 m². What is the rate of flow of water in millilitres per second?
	Ans: mଥം
5	What is the price of the television including 9% GST?
	\$1299 (Price before GST)
	Ans: \$

Se		i.		
⊃ €	: C	uс	п	ь

For questions 6 to 12, show your working clearly in the space provided for each question and write the answers in the spaces provided. The number of marks available is shown in the brackets [] at the end of each question or part-question. (25 marks)

There are 22 girls and 58 boys in a CCA. 30% of the members are Primary 6 students. How many Primary 6 students are there in the CCA?

Ans: ______[2]

A water bottle and a pencil case cost \$27.70. A water bottle and a school bag cost \$106.10. The school bag costs 8 times as much as a pencil case. What is the cost of a school bag?

Ans: _____ [3

8	A photocopying machine can print 100 pages in 24 seconds. At this rate, how long will it take for the machine to print 1600 pages? Give your answer in minutes and seconds.
	Ans: [3]
9	A bakery sold a total of 2600 buns in a day, 45% of the buns were sold in the morning and 40% of the remaining buns were sold in the afternoon. The rest were sold in the evening. How many buns were sold in the evening?
	Ans: [3]
	6

18 000 adults and 7000 children attended the National Day Parade. 45% of the adults were women and 30% of the children were girls. What percentage of the spectators were women and girls?

Ans: _____[4]

11	Allie saved \$1.40 each day from Monday to Friday. She saved \$2.10 each day for Saturday and Sunday. She started saving on a Monday. How many days did it take for Allie to save \$49?
	Ans: [5]
	5

12 The table shows the charges for taxi fare.

Distance travelled	Cost
1st 2km or less	\$4.80
Every additional 400m or part thereof	\$0.35

(a) Mr Anderson's trip was 6 km. How much did he pay for his ride?

Ans:	(a)	2	ļ

(b) Mrs Smith paid \$15.65 for her trip. What was the greatest distance she could have travelled?

Ans:	(b)		 	 [3]
		- 0 -
